

SprintPulse — Participant User Guide

Overview

As a participant, you respond to polls during live sessions such as workshops, retrospectives, and PI events. This guide explains how to access a poll using your team PIN, submit your responses, and what to expect during a session.

Accessing Your Team's Polls

Using a Team PIN

1. Navigate to the app and click **Participant** (e.g., <https://sprintpulse-app.vercel.app>)
2. Enter the **team PIN** provided by your facilitator (e.g., "A3K7")
3. Click **Join Team**
4. You'll see a list of polls available for your team

Note: Your team PIN is remembered in your browser — you won't need to re-enter it next time.

Switching Teams

- Click the **Switch Team** button at the top of the poll list
 - Enter a different team PIN to see another team's polls
-

Joining a Poll

1. From the poll list, click on the poll you want to participate in
2. Enter your **display name** (2–50 characters)
3. Click **Continue**

Your name is stored in your browser for convenience.

Answering Questions

Once you enter your name, the poll questions appear:

- **Desktop:** Questions may be arranged visually on a canvas background
- **Mobile:** Questions appear as a vertical scrollable list

For each question:

1. **Select one option** from the predefined choices
 2. If a **"Custom"** option is available, select it and type your own answer
 3. All questions must be answered before submitting
-

Submitting Your Responses

1. After answering all questions, click **Submit**
2. A confirmation screen appears: “Thank you for your responses!”
3. Your responses are saved — you cannot edit them after submission

Important: You can only submit once per poll from the same browser.

After a Reset

If the facilitator resets the poll: - You’ll see “Already submitted” until you refresh - Click “**Poll was reset? Click to check again**” or refresh the page - You can then re-enter your name and submit again

What Happens During a Live Session

Voting Opens and Closes

- The facilitator controls when voting is open
- If voting is **closed**, you’ll see: “Voting is currently closed”
- If voting **closes while you’re filling in the form**, the submit button is disabled

Results

- The facilitator decides when and how results are revealed
 - Results may be shown on a shared screen during the session
 - If anonymisation is enabled, your name won’t appear in results
 - If anonymisation is disabled and results are set to **DETAILS**, your name will be visible next to your responses (both predefined option selections and custom text)
-

Tips

- Get your team PIN from your facilitator before the session starts
 - Answer promptly once voting opens — the facilitator may close it at any time
 - Use the “Custom” option to share unique perspectives
 - If you lose connection, the app retries automatically
-

Troubleshooting

Issue	Solution
“PIN not recognized”	Double-check the PIN with your facilitator
“Voting is currently closed”	Wait for the facilitator to open voting
“Already submitted”	Click “check again” or refresh after a reset
Page won’t load	Check your internet connection and refresh
Submit button disabled	Ensure all questions are answered

Privacy

- Your responses are stored securely
- The facilitator can enable anonymisation to hide your name from results
- Response data is automatically purged after 90 days
- Your session token prevents duplicate submissions
